---

Dan / Jennifer - We have a stack of rodenticide actions from Hacco responding to the RRM (I just put them in Dan's chair). Most are either for diphacinone or ZP products. All of these also have final packages from PRB for product reregistration. So, I assume that these receipts can be dropped down somewhere under the 676 action code and entered as resubmissions. (Note - that for 3 of the diphacinone products I made "300" records for them before I realized the connection to product reregistration. I can change them back....). Please decide how you want to divide them. You can split them up by ai; If I remember correctly Dan was handling diphacinone and Jen was doing ZP. Let me know what plan you come up with.

thanks,  
john
